Public Comment

11.Public Comment

Minutes:

-C. Maynard provided an overview of the zoning ordinances appearing on the upcoming ballot. She explained that Ordinance 1 proposes increasing the allowable fence height in the Sunrise Lake District from 42” to 48”. Ordinance 2 addresses the removal of the “Family Compound” section of the zoning code, Ms. Maynard noted that existing Family Compound requirements are more restrictive than those for Accessory Dwelling Units (ADUs), rendering the section redundant. She further clarified that the remaining ordinances are state-mandated corrections following changes to state law over the past year. During the discussion, B. Reynolds inquired about permit requirements for ADUs specifically regarding septic systems. Ms. Maynard confirmed that a new septic system would be required if the

existing system is deemed insufficient. In such cases, the property owner must obtain a new septic design and receive approval from the State.

- K. Buzard wanted to know why warrant article 20 regarding Milfoil was for \$5,000 and not \$8,000. She stated she would ask for the amount to be amended at the upcoming town meeting. R. Tufts-Keegan stated that was the same amount from the prior year.

- K. Buzard announced that Dalton Mountain Foresters, the firm hired to develop a forest management plan for the Town Forest, will present a preliminary draft report at the Conservation Commission meeting. The presentation is scheduled for April 14th at 6:30 PM at the Town Hall. All members of the public are encouraged to attend.

Lebrun will work with the various town departments and school to coordinate the project. Chief Ferguson informed Ms. Lebrun that he intended to reach out to Ms. Soars regarding a "bicycle school day" and helmet safety initiatives. The Chief noted that these topics align with recent discussions he has held with the Brain Injury Association regarding helmet safety. Recognizing that Ms. Lebrun is already in communication with the Wakefield Lions Club and Ms. Soars, Chief Ferguson stated he would coordinate directly with her to streamline the planning for a safety event and helmet distribution.

March 9, 2026

Good evening,

I'd like to start by thanking the people of Middleton. The last three years have been quite an experience and a real eye-opener into small-town government. Through it all, I've learned a lot about the kind of leadership I want for my community.

When I started three years ago, the town had some departmental challenges. Five people in this room worked tirelessly to address those issues and set a better path forward. Today, I truly believe we have one of the strongest groups of town employees we've had in a long time. People who work together every day to keep this town running.

I want to give a special shout-out to the Highway Department. They took the time to show me what they do day in and day out, explained their equipment, and how their department operates. Over the last year especially, I've watched them deal with lots of criticism both at meetings and on social media, all while working short-staffed most of the year. Yet they still show up every day and get the job done. Your dedication to Middleton does not go unnoticed. I have enjoyed being your liaison, thank you.

To the employees at the municipal building, thank you as well. Whether it was support with a specific project or just sharing a laugh about life, you've all meant a lot to me. You can see and feel the difference when entering the municipal building and that's because of the pride and care you all bring to your jobs and to this town. Just a side note that I am proud of where both our police and fire dept chiefs have taken their departments, I just was not as involved with those departments.

For the Select Board members to be voted in tomorrow, my hope is simple: bring civility back to the meetings, and be ready to work. This job isn't just showing up on Monday nights. There's a lot that happens behind the scenes and our town is counting on you to do your share.

Lastly, I want to thank my family. They may not have fully understood why I wanted to take this role on, but they supported me every step of the way. Through missed dinners, missed games, Selectmen calls during soccer banquets and even family vacations. They were patient when the negativity spilled over from my world as a Selectmen. That's no easy task for family, but I was the one elected, not them.

Being a Selectman means taking the good with the bad. I leave knowing I did my best and that I always stood on my own two feet, I hope the board moving forward with 2026 will do the same.

Respectfully,

Tracy Donovan-Laviolette, Selectmen Vice Chair

March 2, 2026

To authorize the Chair of the Select Board to sign, on behalf of the Town of Middleton a letter in support of SB538 (2026), relative to extending net metering eligibility terms for municipal energy projects.

Senator Kevin Avar, Chair
Senate Energy and Natural Resources Committee
New Hampshire State House
Concord, NH 03301

Re: Support for SB538 – Ensuring Long-Term Value for Municipal Renewable Energy Projects

Dear Chairman Avar and Members of the Committee,

On behalf of the undersigned communities, we write in strong support of SB538, which extends a 20-year term of eligibility in the net metering 2.0 tariff for “municipal group hosts” and other political subdivision energy projects. Net metering is the cornerstone of the economics of these projects because it allows project owners to get credit for the excess energy they send back to the grid. Without a guarantee that they’ll continue to receive compensation at a predictable rate after 2040, banks, investors, and developers are reluctant to build these projects. For New Hampshire municipalities, school districts, and counties, local renewable energy generation delivers predictable revenue and savings, budget relief, and long-term cost control for taxpayers.

For example, a 5 MW AC solar array is currently under construction in Concord and will supply power to multiple state, school, and municipal facilities signed on as “oftakers” for the project. During its first 15 years in operation, this project will offset over \$1 Million in state and municipal electricity costs, generate more than \$1 Million in new tax revenue for the City of Concord, and invest over \$1 million in local electrical grid improvements. The project will also generate lease income for the private property owner providing the site for this project.

These benefits are not speculative. They are stable, predictable, measurable, and flow directly into municipal budgets, school operating costs, and the local economy. This has a direct benefit for local tax-payers.

The net metering 2.0 tariff for “municipal group hosts” allows a municipality, school district, county, or other political subdivision to build a renewable energy project on one site and use some of that generated power to offset electricity bills at other public facilities. On a small scale, this means an oversized array on the roof of a town hall can generate power for the fire station across town. On a large scale, multiple communities can collaborate to establish a single multi-megawatt solar array rather than multiple smaller arrays, as in the Concord example cited above. Projects can be located on public or private land, as long as the energy is credited to electric meters owned by political subdivisions.

However, uncertainty around how long projects are eligible to receive net metering compensation is fast becoming the single largest barrier to more municipal renewable energy projects like these going forward.

As documented in testimony submitted by Clean Energy NH in support of SB538, solar developers have already abandoned at least 274 MW of large scale solar projects in New Hampshire, and 12 solar companies have exited

the state entirely due to the lack of bankable term certainty. With no guarantee of how compensation after 2040 will be structured and a shrinking payback period, banks and developers are unwilling to invest in these projects.

The result of this lack of certainty represents a lost opportunity on the order of 40–50 large scale projects statewide. For New Hampshire communities, that means \$120-\$150 Million in lost municipal property tax revenue, lease income for landowners, and electricity savings.

For the communities listed below, and for municipalities across New Hampshire, this bill is about protecting local revenue, reducing long-term energy costs, and ensuring that more viable projects can proceed for the benefit of taxpayers.

We respectfully urge the Committee to recommend SB538, Ought to Pass, and to give municipalities the clarity they need to responsibly plan, finance, and benefit from local energy projects.

Sincerely,
